

Managed Azure Cloud

Hand off the administration of Microsoft Azure® cloud resources to our expert team to gain the scalability and flexibility of public cloud without the hassle of ongoing cloud management and integration.

Public Cloud Management

Moving to a cloud-first strategy? Not sure about the best way to migrate to hyperscale cloud? Green House Data is here to help.

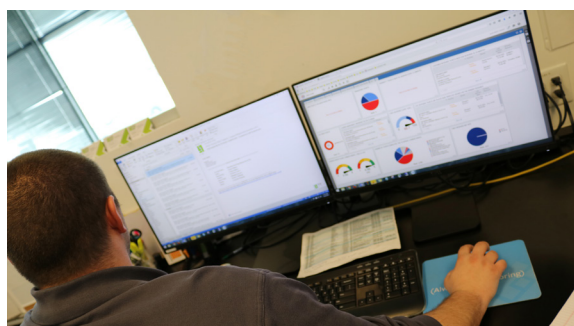

We know the cloud and we know Microsoft. You have business goals to achieve. Free up your IT staff from wrangling infrastructure with a fully managed cloud.

We help you decide which workloads are placed in Azure, which might be a better fit elsewhere, while keeping it all up-to-date and performing at a high level.

Green House Data cloud service staff are **Azure certified** in addition to holding MCSE and other Microsoft credentials. By choosing Green House Data to manage your Azure resources, you get **guaranteed 100% availability, up-to-date systems, and compatibility and interoperability with legacy infrastructure.**

Managed Azure cloud hosting from Green House Data includes:

- 24/7/365 Hear from a HumanSM Support
- Flexible, scalable infrastructure so you only pay for what you need
- Cloud availability zones across the globe
- Always up-to-date operating systems and hypervisor software
- Rapid patching and protection from the latest vulnerabilities
- Block or object storage with SSD availability
- Available Azure Stack management for on-premise
- Fully integrated backup and disaster recovery options: backup and recover to/from on-premise, Green House Data facilities, or Azure availability zones
- Security monitoring and anti-virus/anti-malware tools
